# Workshop on Future Job Roles and New technologies

An subsidiary of Fiabilte Networks

The Job world today is on the lookout for people who can apply their minds rather than act as mere support agents who are only good at following instructions.

Industry needs adaptive innovators and individuals, who can think beyond theories, apply their learning and take quick decisions. Industry also needs individuals who can implement the plans that will add business value.

The corporate world today needs job ready quality resources with high level of Intelligence and Emotional quotient which can yield high productivity and sustainability.

Several studies indicate majority of new engineering graduates do not have the employability skills which the industry expects for specific technical roles. Many top Companies are investing heavily on trainings, internships, induction programs to address and bridge the gap and make the students job ready for eventual productiveness.

**Fiabilite Networks**, under its **“Svasetu”** brand is providing the solutions to industry by addressing these challenges by carrying out various Industry connect Programs in facilitating engineering colleges to provide World class education with the objective of creating Industry ready engineers.

# **Svasetu – Connecting the Textbook to the Technology and Jobs**

## **A Platform To Learn, Develop and Execute the New technology enabled Jobs**

### **Importance of Svasetu Workshop:**

Fiabilite Network Solutions has come out with Svasetu, its unique and innovative product to help the millions of engineering students passing out of the colleges every year in getting jobs. As enunciated by John Maxwell, the renowned American Author, Svasetu 's aim is not only to help place right person in the right place but to place right people in the right place which becomes a force multiplier for the Company, a shot in the arm for the colleges and a winning proposition for the engineering students.

This will help in creating an ecosystem of innovative young skilled India in field of technology and empowering future workers with the right skills to be able to compete in the larger global workforce.

**Svasetu** is designed to provide a platform for development of job oriented skills for students where they can be immediately deployed on projects.

Svasetu Platform is an exclusive opportunity for engineering colleges to create numerous certified Job ready professionals with great project execution and delivery skills covering many Engineering colleges across India.

It is a world class model which involves assessment of analytical skills, technical skills and emotional intelligence followed by workshops by highly capable industry professionals. Under this initiative, Fiabilite Networks is closely associated with Certification bodies, Industry associations and academia to create an enabling environment by allowing access to Svasetu Portal, Webinars from Industry veterans, course materials, practical training, various tests and certification.

# Snapshot of Svasetu Workshop:

Fiabilite Networks has collaborated with Engineering colleges across the country and conducted a series of **Svasetu workshops**, bringing a unique opportunity for students to learn new skill sets required in field such as IOT, Smart cities, Web & Application Development, DB Management, Networking, 5G Technology, Cloud Computing, VLSI, Embedded systems in IOT etc.,

Svasetu will provide the students knowledge about the latest technologies with the job roles prevalent in the market and linking the technologies and the job roles with the text books.

Through this initiative, Fiabilite will work closely with the selected colleges.

The workshop and subsequent Virtual Coporate Programme (Optional) will give students the opportunity to undergo experiential learning by making the students execute actual projects as per industry practices.

## How to get your college registered:

- Get a minimum off 150 suitable students for this Program
- The students will register in the portal after the College confirms the participation of the students for Svasetu program.
- The students need to undergo a Performance Assesment Test after the registration. The PAT is a mix of IQ, EQ & Aptitude questions. There will be a minimum cut off for the PAT for the students to attend the workshop.
- A one /two day (or) days of workshop will be conducted for the eligible students twice per year.
- Maximize participation for 3rd and 4th year Students to have the best outcome.

# Benefits Exclusively On Offer to students and colleges enrolling to Svasetu

## To Students:

- Technology Introduced by Experts who have executed large projects in that area
- Highly interactive sessions
- Practical demonstration of the solutions
- Fiabilite will issue the certificates for participation
- Practical application of learning to the real world and the world of work
- Skill development including Technical Know-how, hands on experience on equipment and team work.
- Information about professional careers, new jobs, career path and study routes, with workshops providing a practical insight into what careers entail

## To Colleges:

- Directly support teaching of the core subjects and course curriculum.
- Suitable for pupils from 4<sup>th</sup> Semester and can be tailored for all disciplines
- Delivered by professionals and Technical evangelists offering a real insight into career and Technologies
- A diverse and professional team to ensure we for responding to students needs
- Fully prepared workshop with all materials provided
- Opportunity to develop and deliver a fully integrated, cross-curriculum project
- Sessions start at very low cost per students, offering fantastic value for money
- Proven track record >30 years of project delivery experience in field of IT, Telecom, IOT and smart Cities.
